

Anthony Miller

Senior Full-Stack Software Engineer

St. Louis, MO · anthony@darrotech.com

Senior full-stack software engineer and founder of Darro Tech LLC. Designs, builds, and operates production systems spanning enterprise analytics platforms, multi-tenant SaaS, AI-integrated applications, and security-hardened APIs. Ships independently. Makes architecture decisions without committee. Based in St. Louis.

Experience

Senior Software Engineer

November 2025 - Present

Roeslein & Associates

- Operation of multiple production web platforms end-to-end — architecture decisions, feature development, deployment, security hardening, and performance optimization.
- Implementation and maintenance of WebAuthn/FIDO2 biometric authentication supporting device passkeys, Windows Hello, Face ID, and fingerprint login — including challenge storage, replay protection, and session token bridge between FIDO2 and JWT auth.
- Improved database query performance through bulk aggregation and cache strategy; streamlined Docker build and deployment pipeline for fast, reliable git-to-container releases.
- Designed and implemented end-to-end test coverage (230+ Jest unit tests, Playwright E2E) with TDD methodology across a production multi-tenant application.
- Provisioned and operated production infrastructure end-to-end: Docker containerization, cloud deployment (Render, AWS RDS, Windows EC2 with PowerShell automation), environment management, and automated multi-section PDF reporting via headless Chromium.

Founder & Principal Engineer

2023 - Present

Darro Tech LLC

- Founded and operate a software consultancy delivering custom web applications, data platforms, and ongoing technical support to businesses and organizations.
- Designed and built a proprietary multi-tenant SaaS platform with client portals, subscription billing management, JWT authentication, email automation, and scheduled statement generation — deployed and live at darrotech.com.
- Delivered full-stack web applications for clients including an event rental company, a pet owner social platform with WebRTC video and Stripe subscriptions, and a civic tech coordination dashboard with AI-assisted article summarization.
- Manage ongoing monthly managed services relationships with active clients; sole engineer responsible for architecture, deployment, security, and support.

Software Engineer

January 2024 - November 2025

Unlocked Labs

- Built features for a full-stack education content platform serving incarcerated individuals — contributed to UI implementation and application logic expanding access to structured learning resources.
- Designed and implemented a data dashboard interface for an alternative energy solutions company — responsible for visualization layout, component development, and usability improvements for operations data.
- Delivered software development work that supported the establishment of a physical Learning Center at the St. Louis Justice Center as part of the STLOVP collaboration — a concrete civic outcome from application work.

Teaching Assistant

February 2023 - December 2023

LaunchCode

- Assisted lead instructors in teaching full-stack web development as part of the LC101 program.
- Provided hands-on guidance in JavaScript, Java, and web development fundamentals.
- Helped students build real-world applications to demonstrate their technical skills.

Education

Central Methodist University

April 2022 - June 2024

Business Administration

LaunchCode

May 2022 - December 2022

Java Developer Certification

Skills

Programming Languages & Tools

Technical Expertise

- Web Development: Spring Boot, Next.js, React, Flask, Node.js, Angular
- Databases: PostgreSQL, MySQL, SQLite, Prisma ORM, pgvector, MongoDB
- Security: WebAuthn/FIDO2, JWT/RBAC, Argon2id, CSRF protection, brute-force & rate limiting, attack-vector test suites
- AI & Data: ARIMA forecasting, Z-score anomaly detection, RAG (vector embeddings, semantic chunking), PDF document intelligence, Pandas, NumPy
- Infrastructure & DevOps: Docker, Render, AWS RDS, AWS EC2, Firebase; self-hosting, VPN mesh, DNS filtering, UFW firewall, uptime monitoring
- Testing: Jest, Playwright, Vitest, pytest, Go test, k6, TDD
- Tools: VS Code, IntelliJ, Git, Docker, Jupyter Notebook

Certifications & Professional Development

Professional Certifications

- LaunchCode — Java Developer Certification (2022)
- Blackstone Career Institute — Legal Assistant/Paralegal with Distinction (2019)
- U.S. Career Institute — Certified Personal Fitness Trainer (2019)

Professional Recognition

- LaunchCode — Recognition of Support for Web Development Course (2023)

Technical Course Completions

Coursera Professional Certificates & Specializations

- IBM AI Developer Professional Certificate (2025)
- IBM Generative AI Specialization (2024)
- IBM Software Development Fundamentals (2025)

Additional Technical Training

- META — Web Development Fundamentals (Frontend & Backend Development) (2024)
- Scrimba — Prompt Engineering for Web Developers (2024)
- AWS — Introduction to Information Technology and AWS Cloud (2024)
